Flash 8 and FileMaker 8.5 Integration - 02NYL572 - lynda.com

Product Description	Time
Flash 8 and FileMaker 8.5 Integration	Approximately 2 Hours
By combining the rich features of Flash and FileMaker, users can create applications with significantly increased capabilities and more robust design. Strong Flash vector-based client-server applications become stronger when featuring a dynamic FileMaker back end, while embedded vector graphics add usability and depth of content to FileMaker databases. Both Flash experts and FileMaker developers will benefit from instructor Cris Ippolite's step-by-step approach to the challenges of integrating these two programs.	 lynda.com
Note: Exercise files accompany the tutorials.	 Chris Ippolite
